Professional Summary

Junior Full Stack Developer with **9+ months of experience** building scalable web applications used by **30+ users**. Experienced with **Spring Boot (Java)** and **React (TypeScript)**, having built **37+ REST endpoints** in production. Clean, maintainable code aligned with full stack development best practices.

Technical Skills

- Backend: Java 21, Spring Boot, Spring AI, Spring Security, NestJS, REST API, JWT, Stripe API.
- Frontend: TypeScript, JavaScript, React, Angular, Vite, Zustand, Redux, Tailwind CSS, shadcn/ui.
- Databases: SQL, MySQL, PostgreSQL, Supabase, Prisma, Flyway.
- DevOps and Agile: Git, Github, Gitlab, Docker, CI/CD, Render, Vercel, Bruno, Scrum/Agile.

Professional Experience

Papalote Museo del Niño Mexico City
Full Stack Developer Jr. January 2026 - May 2026

- Built **15 reusable React components** for an **ERP** used by **30+ users**, using a **server-component-based architecture** (hooks, server actions and API client).
- Built a landing page with form validation and **Supabase Storage** for file and media management.
- Ran **production** database migrations with **Prisma** and **NestJS**, adding **15+ columns** to existing tables in production environments.

Tec Gurus I.T. Quality Services Mexico City
Full Stack Developer Jr. August 2025 - December 2025

- Built and integrated an automated content generation system with **Artificial Intelligence**, validating its effectiveness with **6 key users** from the administrative area.
- Built **10+ REST endpoints** on the backend using Spring Boot, efficiently consumed from **SPA** views developed in **Angular**.
- Organized and automated continuous deployment by configuring **CI/CD pipelines** and **Merge Requests** in **GitLab**.

Projects

Katedra AI - Web application that generates academic content with AI [Backend](#) [Frontend](#)
Personal project May 2026 - August 2026

- Built a **responsive web application** with a **client-server** and **modular monolith** architecture in **React** and **Spring Boot**, with **37 REST endpoints** across 7 modules: **OAuth2** authentication, **Stripe** subscriptions, and role-based access control via **JWT**.
- Integrated the **OpenAI** API Key through **Spring AI** to generate academic content. The Syllabuses module uses **14 endpoints** and extracts content from files and URLs, with **real-time** change history.
- Ran tests in **JUnit 5**, **Mockito**, **AssertJ**, and **Node Test** using an in-memory database. Tested and documented the endpoints in **Bruno**. Deployed the frontend on **Vercel**, consuming the backend on **Render** via **API REST**.

Education

B.Eng. in Information and Communication Technologies Nezahualcóyotl, Mexico
Universidad Tecnológica de Nezahualcóyotl May 2026 - Present

Advanced Technical Degree (TSU) in Information and Communication Technologies Nezahualcóyotl, Mexico
Universidad Tecnológica de Nezahualcóyotl January 2024 - January 2026

Languages

- Spanish Native, English Basic (A2).
